STEP 1: Download the installer:

The screenshot shows a website interface with a blue header containing the breadcrumb "Freeware > Graphics and Photo > Screen Capture". The main content area features a software listing for "Gadwin PrintScreen Automatic Screen Capture Tool". To the left of the text is a small thumbnail image of the software's interface, with a magnifying glass icon and the text "View full size" below it. Underneath the thumbnail is a link that says "More screenshots...". The software's rating is shown as five yellow stars with the text "(Excellent)". A detailed description follows, explaining the tool's features such as one-click capture, multiple file formats (JPG, GIF, PNG, BMP, TGA, TIF), optional drop shadow effects, and the ability to capture specific areas or the entire screen. It also mentions options for copying to the clipboard, auto-saving to a user-defined directory, and setting hotkeys. A final feature mentioned is the ability to email captured images. At the bottom left of the listing, the word "Freeware" is displayed. At the bottom right, there is a prominent blue button with a white download icon and the text "Download".

### Gadwin PrintScreen

**Automatic Screen Capture Tool**

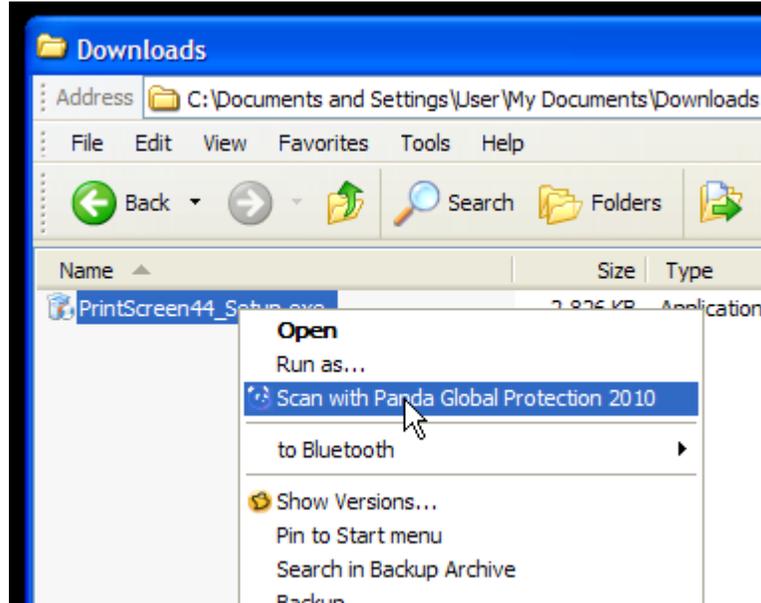

**Our Rating:** ★★★★★ (Excellent)

Gadwin PrintScreen is an easy to use one-click screen capture tool, that captures the contents of your screen. The captured screen can then be sent to the printer, or saved to disk as a file in 6 different graphics file formats (JPG, GIF, PNG, BMP, TGA and TIF) with optional drop shadow effects. Gadwin PrintScreen supports capturing the entire screen, the active window, the client area or a specified rectangular selection with optional inclusion of the mouse cursor. You can choose to copy the captured image to the clipboard or to auto-save it into a default directory of your choice (with auto-naming option). The hot key defaults to the PrintScreen key, but users may also define other keys to initiate a capture. In addition, Gadwin PrintScreen also includes a feature that allows you to e-mail the captured images automatically.

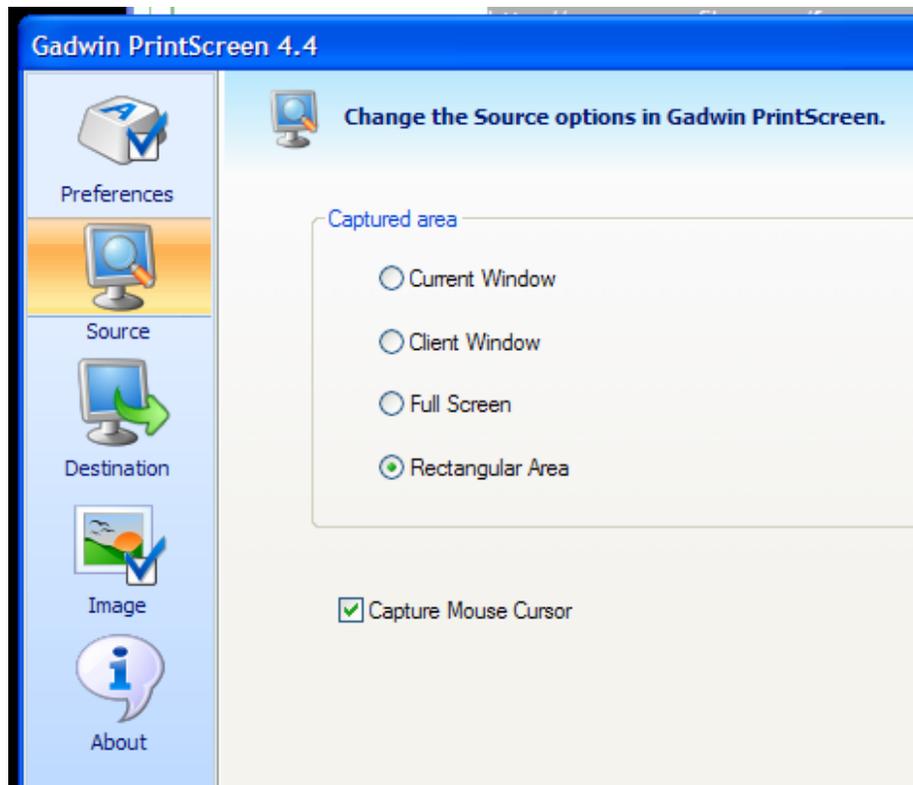

**Freeware**

STEP 2: After downloading the installer, scan it for viruses and/or malware

STEP 3: Run the installer. This installs “Gadwin PrintScreen” on your computer. I recommend you choose the “Rectangular Area” method of selecting the a region of the screen to be captured:

STEP 4: Find something on your screen whose image you wish to capture.

STEP 5: Press the hot key (which you probably left as the default, i.e., the “Prnt Scrn” key). This brings up a Selection Box cursor and a Zoom window. Drag the mouse across a rectangle to choose the area of the screen to be captured

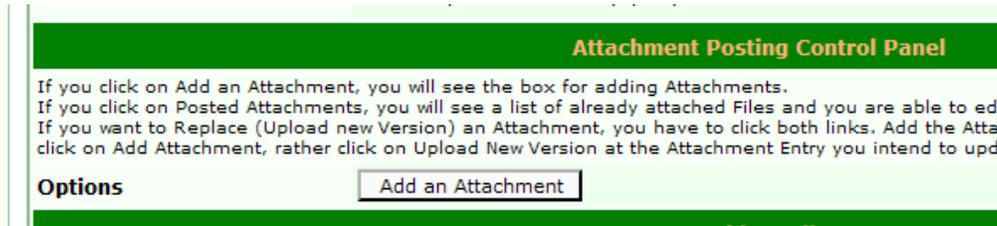

STEP 6: Press the ENTER key. This finalizes the area selection and opens an Image Preview window:

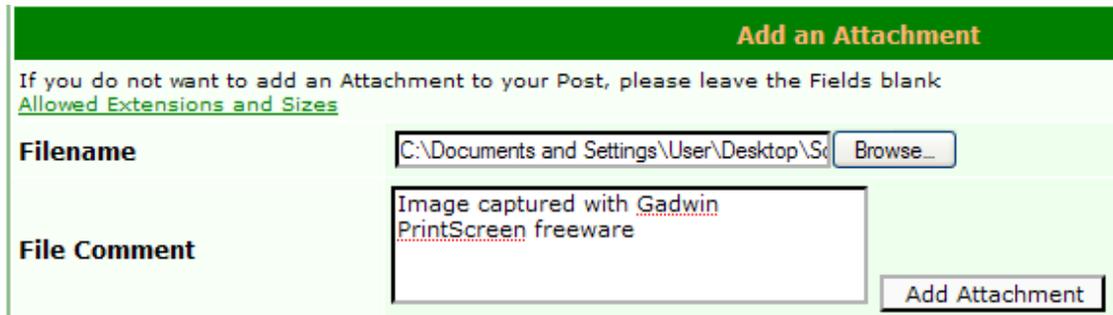

STEP 7: If you are pleased with your captured image, click on “Continue Output” and save the image as a file on your hard drive. Here is the above, after saving:

STEP 8: To paste the captured image into a message on the Trader's Roundtable, edit a message (either "New Topic" or "Reply"), and click on "Add Attachment"

STEP 9: Click the Browse button and navigate to the place on your hard drive where you saved the image file. Add a Comment if you wish:

STEP 10: Click Add Attachment. Success! Congratulations.
